

ADMS 5.2.1

February 2017

Summary

The ADMS 5.2.1 update can only be applied to existing installations of ADMS 5.2.0. It will update AERMOD and AERMET to the latest versions supplied by the US-EPA as well as giving you a new ADMS model from CERC.

File changes

The update will patch the following files:

File	Version
○ ADMSModel.exe	5.2.1
○ aermod.exe	16216r
○ aermod_readme.txt	
○ aermet.exe	16216
○ aermet_readme.txt	
○ red_tick.bmp (new)	

Notes

The new ADMSModel.exe corrects an issue when using the buildings and dry deposition modules together which may have resulted in incorrect concentrations being calculated.

The file red_tick.bmp is necessary for correct functioning of the Comprehensive Output File utility.

Installation

- Download the update from the [User Area](#) on the [CERC](#) website to a convenient location on your PC
- Run the downloaded executable and follow the instructions
