ADMS-Airport Prices

Prices depend on the size of the airport(s). Four classifications (classes) are specified according to Table 1.

Table 1: Airport size classifications

Class	Airport number of passengers per year
1	< 2 million
2	2 – 10 million
3	10 – 40 million
4	> 40 million

Licence can be purchased either as a project licence or an annual licence.

For a 3-month project licence, the licence is for one project only, and extensions for additional months can be purchased if extra time is required to continue on the same project. CERC should be informed of the nature of the project being undertaken.

The prices for project licences are summarised in Table 2.

Table 2: Project licence costs

Class	Price for initial 3 month licence (£K)	Number of dongles
1	2	3
2	4.5	6
3	7.5	9
4	12.5	12

For an annual licence, clients can perform unlimited amount of projects within the licence period and prices are given in Table 3.

Table 3: Annual licence costs

Highest class of airport to be modelled	Annual licence price (£K)	Number of dongles
1	12	3
2	27	6
3	50	9
4	80	12

All prices are subject to VAT and support is provided subject to users attending an ADMS-Airport training course.
