

Environmental software developers

CERC is seeking to recruit two full-time software developers.

CERC is a small but influential scientific company based in Cambridge (UK), developing software for air pollution modelling. Our ADMS software is an international market leader. We have agents in Europe & China, and collaborative commercial and research projects worldwide. Our software provides high-profile air quality forecasts for London and Hong Kong. For more information, see www.cerc.co.uk.

We require experience of Visual Basic 6, VB.Net or C#. Additionally CSS, Javascript, SQL, Windows, Linux, Azure and Google Cloud Platform are advantageous, as is programming experience in a commercial environment. As a member of our team you will target Windows desktop, with opportunities to work with web applications and cloud platforms. Our team environment provides mentoring and training. The tasks are intellectually challenging and driven by commercial considerations, so you must work to a brief, communicate clearly and meet deadlines.

Salary will depend on experience but is likely to be £26,500 to £34,000 p/a. The post is in our Cambridge office, although remote working may be necessary during the pandemic.

In order to make sure that you and the position are a good match, you will initially be employed on a three-month probationary period. The posts are initially for one year, but may be extended.

Please send your CV and covering letter, stating your availability and quoting reference ESD04 to: jobs@cerc.co.uk

Closing date 23 May 2021. No agencies. We do not sponsor applications for the right to work in the UK.
